

Steps to disable verify pin on every login of Salesforce:

1) Click on **Setup** option

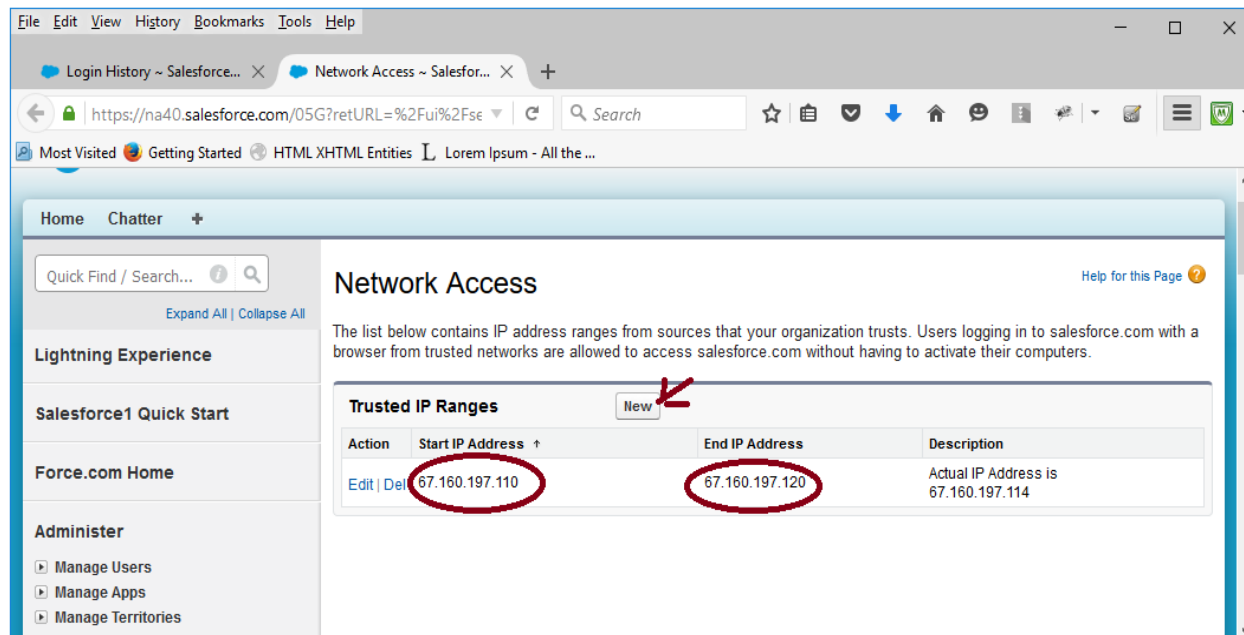

2) Click on **Manage Users** and Select **Login History**.

3) Copy your **Source IP Address** (Sample IP Address **67.160.197.114**)

6) Enter your **End IP Address** (like **67.160.197.120** - This is Sample IP, you need to take your Source IP Address and last three number for End IP Address is selected based on the range of your Source IP Address) and **Save** this.

The screenshot shows the Salesforce 'Network Access' page. The left sidebar contains navigation links: Home, Chatter, Quick Find / Search..., Lightning Experience, Salesforce1 Quick Start, Force.com Home, and Administer (with sub-links for Manage Users, Manage Apps, and Manage Territories). The main content area is titled 'Network Access' and includes a 'Help for this Page' link. Below the title is a descriptive paragraph about trusted IP ranges. A table titled 'Trusted IP Ranges' is displayed, with a 'New' button above it. The table has four columns: Action, Start IP Address, End IP Address, and Description. A single row is shown with '67.160.197.110' in the Start IP Address column and '67.160.197.120' in the End IP Address column. Both IP addresses are circled in red. The Description column for this row states 'Actual IP Address is 67.160.197.114'. A red arrow points to the 'New' button.

Action	Start IP Address	End IP Address	Description
<a href="#">Edit</a>   <a href="#">Delete</a>	67.160.197.110	67.160.197.120	Actual IP Address is 67.160.197.114

7) If you login again, it won't ask for pin verification.
